

Astrid deRidder

Content & Learning Expert

VP of Content, Save My Exams · astridderidder.com

20+ years modernising editorial operations across edtech, higher education, and international publishing — Cambridge University Press, Springer Nature, FutureLearn, and consulting for the World Bank on curriculum and textbook reform in Armenia and Vietnam. At Save My Exams, built the Content Quality Index (CQI), the quality framework now standard across the platform, including QA of AI-generated content at scale.

SPEAKING TOPICS

- **Why “AI-generated” and “accurate” aren’t the same claim** — what gets lost when content is technically correct but not specific enough to the exact context a learner needs.
- **Measuring quality honestly** — what it actually takes to test whether a quality framework produces agreement between independent reviewers.
- **What learning science looks like at platform scale** — testing decades-old lab findings against millions of real, self-directed users.

PAST SPEAKING

- Panel, “Solutions for solving the student retention crisis,” Bett UK, 2025
- Bett UK, 2024 — representing Save My Exams
- Keynote, “The Changing Nature of Publishing,” Typefi User Conference, 2016
- Case study, London Book Fair Accessibility Action Group, on the Marrakesh Treaty
